

# Code Challenge

## A journey through Data Science

### Intro

The desire is that this challenge takes one through the joys of exploring data and the many angles one may use to approach what was a much simpler dataset and ensure they can provide insights in ways that are relevant to the community around them

### Pack

You are provided with the following

- A jupyter notebook - DataAnalyticsCodeChallenge.ipynb
- A synthetic dataset - data1.csv

### Rules

- The work is to be done within the ipynb file
- The file is then saved as *teamname.ipynb* or *surname.ipynb*
- Use the dataset provided and not any other dataset.

### Delivarbles

- An jupyter notebook with all your work.
